

# SPECIFICATIE TEHNICA - MF16

## Caratteristiche Funzionali:

• Pre-alarm and alarm functions
• A monitored line for bells
• System TEST function for lines and auxiliary outputs
• Slots for max. 4auxiliary or zone board
• Singularly excludibles zones
• General reset from panel
• Sirene output escludibile
• Open collector output for alarm repeating on each zone and one for failure
• According to EN54-2 standard

## Caratteristiche Tecniche:

Detectors for zones	32
Function	manned/unmanned
Delay alarm timer up to	5min
Keypad activation	combination of two button
Zones number	4 (expandible up to 16 by FCM4C1 or FCM4C2)
Detecting zones monitored with impedance variation	16
Power supply voltage	230V~ ±5% 50Hz
Service output voltage	27,6Vdc 3A
Space for battery	2 B12V 7,5Ah (B12V7.5A) or B12V 18Ah (B12V18A) for series connection (not included)
Power supplier / battery charger	27,6V / 1,5A
Relay contact	220V / 5A
Relay outputs for "failure" alarm	C/NC/NO
Dimensions (W)	380mm
Dimensions (H)	290mm
Dimensions (D)	96mm
